The flu vaccine is very safe and generally people have no reaction. The most common side effects are tenderness, swelling and redness at the site of injection which usually disappears within a few days. A small percentage of people may experience a mild fever and feel unwell for a few days – this is not the flu. These symptoms clear up within a few days.

*It is recommended that all people who receive the flu vaccination **remain in the vicinity for 15 minutes** in case of an allergic response.*

I have read and understood this information and the consumer Medicine information for this vaccine. YES NO
